WHY RE-UPHOLSTER WHEN YOU COULD JUST BUY NEW?

The truth is that they really don't make furniture like they used to! Much of the furniture on the market today is not built to last or pass the test of time, whilst your older furniture was. The frame-work of your lounge suite is highly likely to be of a much better quality, than most manufactured today.

So even if your furniture is a bit dated, at Karl's we are able to adapt an older-style lounge suite, and update it with modern lines, possibly new legs for a totally new and refreshed look.

We offer extensive experience remodelling, and alteration to lounge frames to update and modernise with a look that will amaze you.

If you think there is no life left in an old piece of furniture, don't despair, Karl's Upholstery has performed the impossible in the repairing of old, or damaged framework, re-webbing the entire suite, and replacing the old with all new cushion inserts for many types of lounges.

Remember your antiques and family heirlooms have a sentimental value so only trust a qualified and superior craftsman.

We encourage you to try and find a better quality more cost effective alternative, because we know that to replace your furniture with the equivalent in quality would be far more expensive.
